SUMMARY

Quality engineer with **14 years of experience** helping teams solve tough problems and deliver reliable products, from automotive and aviation seating at Transcal to semiconductor backend manufacturing at Infineon. Today I support customers across Europe, America, Japan, and Korea, turning complaints into lasting fixes through 8D, root-cause analysis, and close teamwork. I am always eager to learn, and I enjoy building practical web apps that make everyday life a little easier.

CAREER HISTORY (14 YEARS WORK EXPERIENCE)

Staff Engineer Customer Quality Engineering — Infineon Technologies, Indonesia

Area	Europe, America, Japan, and Korea Region Customers
Job Function	Customer Quality Management
Duration	Jan 2023 – Present
Product Handled	Power semiconductors for switching and power control, housed in small outline packages with leads on two sides (DSO 300/430 mil, Smart7 TSDSO 150 mil, HSOF) and quad flat or no-lead packages (QFP, QFN, VSON, TDSON).

Roles and Responsibilities:

- Led cross-functional teams on customer complaints, covering event evaluation, containment, and 8D.
- Served as primary contact for customers in Europe, America, Japan, and Korea.
- Represented the site in BackEnd (BE) Critical 8D sharing and read-across activities.
- Maintained the problem-solving database and monitored complaint trends.

Achievements:

- Built a semi-automated event chart PPT generator on an Excel dashboard with VBA macros, cutting preparation time by over 90% (from 1–2 hours to 5 minutes).
- Delivered an 88% productivity gain by building a Tableau dashboard for automated data visualization and tracking.
- Cut Greater China customer 8D completion time by 54% through a streamlined 8D execution system, eliminating escalations from long lead times.
- Reduced defect rate by 40% and achieved zero customer complaints on key products by enforcing implementation actions through a structured tracking system.

Senior Supplier Quality Engineer — PCI Private Limited (a Celestica Company), Indonesia

Area	Business Unit 1 and 3
Job Function	Supplier Quality Management
Duration	Jan 2022 – Jan 2023 (1 Year)
Product Handled	Electrical: IC, Resistor, Battery, Cable Assy/Wire; Mechanical: Plastic Parts, Rubber Parts, Screw, Nut, Metal plate; Paper: Box, Manual book, Label; Assemblies: Printed Circuit Board, LCD, Touch Panel

Roles and Responsibilities:

- Resolved supplier Non-Conformance Material Report (NCMR) issues and material quality issues.
- Ran Material Review Board (MRB) meetings and reviewed suppliers' 8D Corrective and Preventive Action (CAPA) effectiveness.
- Tracked Supplier Reject Note (SRN) closures in SAP, pushing suppliers to expedite dispositions and recovery actions and escalating overdue items.
- Reviewed and finalized suppliers' scorecards for quality reviews, driving improvement plans for problematic suppliers.

Achievements:

- Cut Supplier Corrective Action Request (SCAR) closure time by 25% with a standardized CAPA reporting format and tracking record.
- Improved SRN and Return PO efficiency in SAP by 40% with a standard work instruction and training module.
- Reduced average NCMR resolution time by 50% with an enhanced open-NCMR monitoring and tracking report that uses Excel formulas to auto-calculate aging and highlight items.
- Reduced display-related returns by 20% by developing an LCD display tester.
- Reduced home icon key cap slant and dimension-related returns by 70% through supplier on-site coaching.
- Recovered 70% of aging low-battery-capacity defects by developing battery capacity testers and multi-unit charging stations.
- Lowered a local plastic supplier's Defective Parts Per Million (DPPM) by 25% through coaching and pre-shipment inspection.

QA Executive & QA/QC Manager — Transcal Private Limited, Indonesia

Area	All business units
Job Function	QA (Customer Complaint, Document Control, Calibration, Measurement System Analysis (MSA)) & QC (Incoming–Final QC) and R&D Support Engineer
Duration	Dec 2011 – Jan 2022 (10 Years 1 Month)
Product Handled	Automotive: seat covers with airbag seam control. Aviation: aircraft curtains and interior soft trim, foam seating, European Aviation Safety Agency (EASA) Part 21 Subpart G release certificate. Rail: rail seating, curtains and interior soft trim, foam seating.

Roles and Responsibilities:

- Supported the Quality Director in maintaining ISO 9001, IATF 16949, and EASA Part 21 Subpart G systems.
- Ran internal audits and monthly quality objective reviews to drive compliance and improvement.
- Owned process capability (Cpk/Ppk), Xbar-R charts, Gage Repeatability and Reproducibility (GR&R) studies, and calibration.
- Maintained Failure Mode and Effects Analysis (FMEA), Control Plans, and Work Instructions; coordinated Production Part Approval Process (PPAP) and Certificate of Conformance (CoC) releases.
- Managed customer relationships and quality concerns to protect satisfaction and loyalty.
- Ran supplier audits and performance reviews to uphold vendor quality standards.
- Led incoming, in-process, and final QC to improve product quality and reduce complaints.
- Assessed supervised staff's skills and training needs to build a stronger QA/QC team.

Achievements:

- Promoted to QA/QC Manager, leading quality control and team management.
- Led the IATF 16949:2016 certification project to zero major findings.
- Set up an in-house lab with standardized reporting and control charts, which helped win new business in Europe and Singapore, cutting lead times by 90% and costs by 80% versus third-party labs.
- Restored 100% on-time deliveries for an automotive customer by streamlining assembly for right-first-time quality.
- Cut scrap by 80% on aircraft seating laminated pads with a pre-conditioning room and revised lamination parameters.
- Cut broken seam defects and scrap by 70% with servo motor and needle management upgrades.
- Resolved an SGD 120,000 non-conforming leather claim through data-driven supplier negotiation.
- Supported the Quality Director's on-site audit in China and a PVC supplier's new site approval, cutting non-conforming materials by 80% through improved supplier relationship and communication.

SKILLS

- Problem Solving: 8D, Root-Cause Analysis, 3x5 Whys, Fault-Tree Analysis, Customer Complaint Management
- Containment: Stock Assessment (In-house, In-transit, At Customer), Risk Assessment, Recall and Re-screening Decision, Recovery Plan
- Failure Analysis (Semiconductor Package):

  - Non-Destructive: Electrical Curve Tracer, InfraRed Lock-In Thermography (IR-LIT) Hotspot, Optical Microscopy, Scanning Acoustic Microscopy (SAM), 2D and 3D X-ray
  - Surface Analysis: Scanning Electron Microscopy (SEM) with Energy-Dispersive X-ray (EDX), Time-of-Flight Secondary Ion Mass Spectrometry (ToF-SIMS)
  - Destructive: Decapsulation (Mechanical, Plasma, Chemical), Cross-Sectioning, Wire Pull
- Process & Measurement: PFMEA, Statistical Process Control (SPC), MSA, GR&R, Cpk/Ppk, PPAP
- Quality Systems & Standards: IATF 16949, ISO 9001, EASA Part 21, Supplier Quality Management, MRB, Internal Audits, Change Management
- Tools: Microsoft 365 (Excel with VBA Macros, PowerPoint, Word, Outlook, Teams, SharePoint, Copilot), Tableau, SAP, Python (Learning)

LANGUAGES

Bahasa Indonesia Native
English Business Fluent
Mandarin Chinese Basic Conversation

EDUCATION

Bachelor of Business Administration — Universitas Internasional Batam
Duration Aug 2011 – Apr 2015
GPA 3.59 (1 lowest – 4 highest)

TRAININGS & CERTIFICATIONS

- Project Management Essentials – Infineon Technologies – Apr 2026
- Reliability: Technology and Product Reliability – Infineon Technologies – Jan 2025
- Backend 6-Steps Manufacturing Excellence: Basic Training – Infineon Technologies – Feb 2024
- Problem Solving Essentials Training & Yellow Belt – Infineon Technologies – May 2023
- Customer Complaint Management Process – Infineon Technologies – Jan 2023
- 8D Problem Solving Method – Infineon Technologies – Jan 2023
- FMEA – Design & Process FMEA – Infineon Technologies – Feb 2023
- Statistical Process Control (SPC) – Infineon Technologies – Feb 2023
- Lean Six Sigma Green Belt – Prodemy Asia / The Council for Six Sigma Certification (CSSC) – Feb 2021
- IATF 16949:2016 Process Approach Audit for 1st and 2nd Party Auditor – Neville Clarke – Jun 2017
- IRCA-certified Quality Management System Lead Auditor course – SQI International Pte Ltd – Mar 2015
- EASA Part 21 Subpart G Introduction & EASA Form 1 Completion Standards – Transcal – Mar 2015
- **Other trainings:** 2026: Machine Learning Fundamentals; 2025: Event Evaluation Basics; 2023: Tableau Essentials; 7 Habits Foundations Program; Leading Basics; Deviation and Decision Management in Backend; Quality Management System and QM Manual; Change Management in Backend; 2020: Overall Equipment Effectiveness (OEE); 2017: Lean Manufacturing; Interpretation & Application of Cost of Quality; 2016: Measurement System Analysis (MSA); Process Failure Mode and Effect Analysis (PFMEA); Production Part Approval Process (PPAP); Advanced Product Quality Planning (APQP); Statistical Process Control (training by JQ Management); ISO/TS 16949:2009 Quality Management System (QMS) Internal Auditor.
