SUMMARY

Quality engineer with **14 years of experience** helping teams solve tough problems and deliver reliable products, from automotive and aviation seating at Transcal to semiconductor backend manufacturing at Infineon. Today I support customers across Europe, America, Japan, and Korea, turning complaints into lasting fixes through 8D, root-cause analysis, and close teamwork. I am always eager to learn, and I enjoy building practical web apps that make everyday life a little easier.

CAREER HISTORY (14 YEARS WORK EXPERIENCE)

Senior Customer Quality Engineer — Infineon Technologies, Indonesia

Area	Europe, America, Japan, and Korea Region Customers
Job Function	Customer Quality Management
Duration	Jan 2023 – Present
Product Handled	Power semiconductors for switching and power control, housed in small outline packages with leads on two sides (DSO 300/430 mil, Smart7 TSDSO 150 mil, HSOF) and quad flat or no-lead packages (QFP, QFN, VSON, TDSON).

Roles and Responsibilities:

- Led cross-functional teams to resolve customer complaints, ensuring effective resource allocation, to deliver swift and effective problem-solving.
- Coordinated event evaluation and containment efforts, ensuring prompt and thorough resolution of critical issues, preventing escalation due to customer line down/disruption.
- Served as primary contact window for Europe, America, Japan and Korea region customers, providing timely and effective support on customer complaint related topics.
- Represented the site in BE Critical 8D Sharing & Implementation and Read Across Activity, facilitating the sharing of best practices and lessons learned across sites, and driving continuous improvement.
- Maintained the integrity of the problem-solving database, ensuring reliable data for analysis and reporting, and enabling data-driven decision making.
- Monitored customer complaint trends, identifying opportunities for improvement and proactively preventing potential issues.

Achievements:

- Built a semi-automated event chart PPT generator on an Excel dashboard with VBA macros, cutting preparation time by over 90% (from 1–2 hours to 5 minutes) and freeing engineers to focus on process improvement rather than reporting.
- Delivered an 88% productivity gain by building a Tableau dashboard for automated data visualization and tracking.
- Cut 8D completion time for GC customers by 54% through a streamlined 8D execution system, eliminating customer escalations caused by long 8D lead times.
- Reduced defect rate by 40% and achieved zero customer complaints on key products by enforcing implementation actions through a structured tracking system.

Senior Supplier Quality Engineer — PCI Private Limited (a Celestica Company), Indonesia

Area	Business Unit 1 and 3
Job Function	Supplier Quality Management
Duration	Jan 2022 – Jan 2023 (1 Year)
Product Handled	Electrical: IC, Resistor, Battery, Cable Assy/Wire; Mechanical: Plastic Parts, Rubber Parts, Screw, Nut, Metal plate; Paper: Box, Manual book, Label; Assemblies: Printed Circuit Board, LCD, Touch Panel

Roles and Responsibilities:

- Supported the resolution of supplier non-conformance issues (NCMR) and material quality matters, enhancing production efficiency and product quality.
- Facilitated Material Review Board (MRB) meetings, providing insights that led to the confirmation and mitigation of defective parts, minimizing production disruptions.
- Reviewed and assessed the effectiveness of suppliers' corrective actions (8D CAPA), contributing to improvements in parts quality and strengthening supplier accountability.
- Monitored and followed up on SRN closures within the SAP system, reducing backlog and ensuring clear communication with suppliers regarding dispositions and recovery actions.
- Assembled suppliers' scorecards for quality performance reviews, targeting conciliation with problematic suppliers and driving collaborative efforts to rectify quality issues.
- Led continuous improvement activities, identifying suppliers with high NCMR reject rates and implementing strategic action plans, which reduced quality incidents and improved material quality.

Achievements:

- Cut SCAR closure time by 25% by developing a standardized supplier 8D corrective and preventive action reporting standard and tracking record.
- Improved SRN and Return PO creation efficiency in SAP by 40% through a standardized work instruction and training module, reducing errors and processing time.
- Reduced average NCMR resolution time by 50% with an enhanced open-NCMR monitoring and tracking report, ensuring timely issue resolution.
- Reduced display-related returns by 20% by developing an LED/LCD display tester.
- Reduced home icon key cap slant and dimension-related returns by 70% through on-site coaching.
- Recovered 70% of aging low-battery-capacity defects by developing a battery capacity tester and charging stations to support production.
- Lowered a local plastic part supplier's DPPM by 25% through on-site coaching and pre-shipment inspection.

QA Executive & QA/QC Manager — Transcal Private Limited, Indonesia

Area	All business units
Job Function	QA (Customer Complaint, Document Control, Calibration, MSA) & QC (Incoming–Final QC) and R&D Support Engineer
Duration	Dec 2011 – Jan 2022 (10 Years 1 Month)
Product Handled	Automotive: seat covers with airbag seam control. Aviation: aircraft curtains and interior soft trim, foam seating, EASA Part 21 Subpart G release certificate. Rail: rail seating, curtains and interior soft trim, foam seating.

Roles and Responsibilities:

- Supported the Quality Director to establish, implement, and maintain ISO 9001 and IATF 16949 Quality Systems as well as EASA Part 21 Subpart G documentation.
- Scheduled, conducted, and monitored internal audits, ensuring compliance and continual improvement across organizational processes.
- Organized monthly Quality Objective Evaluation Meetings, facilitating cross-departmental reviews and driving quality-focused initiatives.
- Conducted Process Capability and Performance Studies (Cpk and Ppk), providing insights into process efficiency and guiding quality improvements.
- Developed Xbar-R control charts, enabling effective monitoring and control of process variation.
- Executed Gage Repeatability and Reproducibility (GR&R) studies, ensuring measurement equipment accuracy and reliability.
- Maintained calibration of measuring equipment, upholding accuracy standards and supporting the integrity of quality measurements.

- Established and maintained FMEA, Control Plans, and Work Instructions, providing a foundation for reliable quality control and risk mitigation.
- Managed cross-functional coordination of PPAP package preparation and submission.
- Coordinated Certificate of Conformance (CoC) and product certification release prior to deliveries, ensuring compliance with customer requirements and industry standards.
- Fostered customer relationships by addressing product specifications and quality concerns, resulting in high satisfaction and strengthened loyalty.
- Regularly updated and reviewed quality standards to align with customer requirements, ensuring product specifications met or exceeded expectations.
- Planned and executed supplier audits, ensuring vendor quality standards were upheld.
- Reviewed and evaluated supplier performance, providing actionable recommendations that improved supplier quality and procurement effectiveness.
- Led Incoming, In-process, and Final Quality Control activities, improving overall product quality and reducing customer complaints.
- Identified responsibilities, authorities, and training needs of supervised staff, building a more competent and efficient quality team.

Achievements:

- Promoted to QA/QC Manager, leading quality control and team management with a focus on quality assurance and process improvement.
- Led the IATF 16949:2016 certification project to a successful outcome with zero major findings.
- Contributed technical support and in-house lab testing capabilities to win new business from automotive accessory and aviation engineering customers in Europe and Singapore, cutting lead times by 90% and costs by 80% versus third-party labs.
- Restored 100% on-time deliveries for an automotive customer's headphone bags by streamlining assembly steps for right-first-time quality and delivery targets.
- Cut scrap by 80% on aircraft seating laminated pads by implementing a pre-conditioning room and re-characterizing lamination parameters.
- Reduced broken seam defects and scrap by 70% by installing servo motor technology and a needle management system to address blunt needle issues.
- Resolved an SGD 120,000 non-conforming microfiber leather return and claim through data-driven supplier negotiation.
- Supported the Quality Director's on-site audit and approval of a PVC leather supplier's new production site in China, cutting non-conforming materials by 80% through improved communication and collaboration.

SKILLS

- Excellent data analysis, compilation, communication, and presentation skills in English
- Capable of working in a team and dynamic environment
- Strong attention to detail; able to solve issues within the timeline given
- Well-equipped problem-solving skills and strong coordination with team members
- Standards and methods: IATF 16949, ISO 9001, EASA Part 21, 8D, PPAP, FMEA, SPC, MSA, GR&R, Cpk/Ppk

LANGUAGES

Bahasa Indonesia	Native
English	Business Fluent
Mandarin Chinese	Basic Conversation

EDUCATION

Bachelor of Business Administration — Universitas Internasional Batam

Duration	Aug 2011 – Apr 2015
GPA	3.59 (1 lowest – 4 highest)

TRAININGS & CERTIFICATIONS

- Project Management Essentials – Infineon Technologies – Apr 2026
- Reliability: Technology and Product Reliability – Infineon Technologies – Jan 2025
- Backend 6-Steps Manufacturing Excellence: Basic Training – Infineon Technologies – Feb 2024
- Problem Solving Essentials Training & Yellow Belt – Infineon Technologies – May 2023
- Customer Complaint Management Process – Infineon Technologies – Jan 2023
- 8D Problem Solving Method – Infineon Technologies – Jan 2023
- FMEA – Design & Process FMEA – Infineon Technologies – Feb 2023
- Statistical Process Control (SPC) – Infineon Technologies – Feb 2023
- Lean Six Sigma Green Belt – Prodemy Asia / The Council for Six Sigma Certification (CSSC) – Feb 2021
- IATF 16949:2016 Process Approach Audit for 1st and 2nd Party Auditor – Neville Clarke – Jun 2017
- IRCA Quality Management System Lead Auditor – SQI International Pte Ltd – Mar 2015
- EASA Part 21 Subpart G Introduction & EASA Form 1 Completion Standards – Transcal – Mar 2015
- **Other trainings:** 2026: Machine Learning Fundamentals; 2025: Event Evaluation Basics; 2023: Tableau Essentials; 7 Habits Foundations Program; Leading Basics; Deviation and Decision Management in Backend; Quality Management System and QM Manual; Change Management in Backend; 5 Why Tool; 2020: Overall Equipment Effectiveness (OEE); 2017: Lean Manufacturing; Interpretation & Application of Cost of Quality; Interpretation & Application of ISO 9001:2015; 2016: Measurement System Analysis (MSA); Process Failure Mode and Effect Analysis (PFMEA); Production Part Approval Process (PPAP); Advanced Product Quality Planning (APQP); Statistical Process Control (JQ Management); ISO/TS 16949:2009 QMS Internal Auditor; 2015: Shimadzu Tensile Testing Machine Operation.
