dannychenjh@gmail.com | Batam, Indonesia

SUMMARY Result-focused professional with **14 years of experience in QA/QC, supplier quality, and customer quality,** with a proven track record of driving process optimization, quality assurance, and supplier quality management. Possesses strong leadership and problem-solving abilities, with a focus on delivering measurable results in high-pressure environments.

CAREER HISTORY (14 Years Work Experiences)

Senior Customer Quality Engineer at Infineon Technologies, Indonesia

Area : Europe, America, Japan, and Korea Region Customers
Job Function : Customer Quality Management
Duration : Jan 2023 ~ Present
Product Handled : Power Devices, DSO300/430 Packages, Smart7 TSDSO 150 Mils, TDSON, QFP/QFN

Roles and Responsibilities:

- Led cross-functional teams to resolve customer complaints, ensuring effective resource allocation, to deliver swift and effective problem-solving.
- Coordinated event evaluation and containment efforts, ensuring prompt and thorough resolution of critical issues, preventing escalation due customer line down/disruption.
- Served as Primary contact window for Europe, America, Japan and Korea region Customers, providing timely support and effective support for customer complaint related topic.
- Represented the site in BE Critical 8D Sharing & Implementation and Read Across Activity, facilitating the sharing of best practices and lessons learned across sites, and driving continuous improvement.
- Maintained the integrity of the problem-solving database, ensuring reliable data for analysis and reporting, and enabling data-driven decision making.
- Monitored Customer Complaint trends, identifying opportunities for improvement and proactively preventing potential issues.

Achievements:

1. Achieved 88% productivity gain by implementing a Tableau dashboard for auto data visualization and tracking.
2. Improved 8D completion time for GC Customers by 54% by establishing system for streamlining 8D execution, resulting in zero escalation from Customer due to long 8D lead time.
3. Reduced defect rate by 40% and zero customer complaints for HVDriver products by implementing system for enforcement of implementation actions, resulting in accelerated improvement in product quality.

Senior Supplier Quality Engineer at PCI Private Limited (a Celestica Company), Indonesia

Area : Business Unit 1 and 3
Job Function : Supplier Quality Management
Duration : Jan 2022 ~ Jan 2023 (1 Year)
Product Handled : Electrical Parts (e.g. IC, Resistor, Battery, Cable Assy/Wire), Plastic Parts, Rubber Parts, Mechanical Parts (Screw, Nut, Metal plate), Paper Parts (Box, Manual book, Label), Printed Circuit Board, LCD, Touch Panel

Roles and Responsibilities:

- Supported the resolution of supplier non-conformance issues (NCMR) and material quality matters, enhancing production efficiency and product quality.
- Facilitated Material Review Board (MRB) meetings, providing insights that led to the confirmation and mitigation of defective parts, thereby minimizing production disruptions.
- Reviewed and assessed the effectiveness of suppliers' corrective actions (8D CAPA), contributing to improvements in parts quality and strengthening supplier accountability.
- Diligently monitored and followed up on SRN closures within the SAP system, effectively reducing backlog and ensuring clear communication with suppliers regarding dispositions and recovery actions.
- Assembled suppliers' scorecards for quality performance reviews, targeting conciliation with problematic suppliers, and driving collaborative efforts to rectify quality issues.
- Led continuous improvement activities, identifying suppliers with high NCMR reject rates and implementing strategic action plans, which reduced quality incidents and improved material quality.

Achievements:

1. Achieved 25% reduction in SCAR closure time by developing Improved Supplier Corrective & Preventive Action (8D format) Reporting Standard and Tracking Record.
2. Improved efficiency in SRN and Return PO Creation in SAP system by 40% by creating a standardized Work Instruction and Training Module resulting in reduction in errors and processing time.
3. Reduced average resolution time by 50% through enhanced Open NCMR Monitoring and Tracking Report, ensuring timely and effective issue resolution.
4. Reduced Omnitracs Home Icon Key Cap Slant and Dimension related returns by 70% through on-site coaching.
5. Salvaged 70% of Weber aging low battery capacity related defects by developing Battery Capacity Tester and Charging Stations, ensuring accurate and efficient testing and charging to support production needs.
6. Reduced display-related returns by 20% through development of LED, LCD Display Tester.
7. Improved the DPPM of Local Plastic Part supplier defect rate by 25% through on-site support coaching and Pre-shipment inspection.

QA Executive & QA QC Manager at TRANSCAL Private Limited, Indonesia

Area	: All business units
Job Function	: QA (Customer Complaint, Document Control, Calibration, MSA) & QC (Incoming-Final QC) and R&D Support Engineer
Duration	: Dec 2011 ~ Jan 2022 (10 Years 1 Month)
Product Handled	: Automotive, Aviation, Marine, Train Seat Covers.

Roles and Responsibilities:

- Supported Quality Director to establish, implement, and maintain the ISO 9001 and IATF 16949 Quality Systems as well as EASA Part 21 Subpart G documentation.
- Scheduled, conducted, and monitored internal audits, ensuring compliance and continual improvement across organizational processes.
- Organized Monthly Quality Objective Evaluation Meetings, facilitating cross-departmental reviews and driving quality-focused initiatives.
- Conducted Process Capability and Performance Studies (CpK and PpK), providing insights into process efficiency and guiding quality improvements.
- Developed Xbar-R Control Charts, enabling effective monitoring and control of process variations.
- Executed Gage Repeatability and Reproducibility Studies (GR&R), ensuring measurement equipment accuracy and reliability.
- Maintained the calibration of measuring equipment, upholding accuracy standards and supporting the integrity of quality measurements.
- Established and maintained FMEA, Control Plans, and Working Instructions, providing a foundation for reliable quality control and risk mitigation practices.
- Managed cross-functional team coordination of PPAP package preparation and submission.
- Coordinated CoC or Certification of Product release prior to deliveries, ensuring compliance with customer requirements and industry standards
- Fostered relationships with customers by effectively addressing product specifications and quality concerns, resulting in high satisfaction rates and strengthened loyalty.
- Regularly updated and reviewed quality standards to align with customer requirements, ensuring that product specifications consistently met or exceeded expectations.
- Planned and executed supplier audits, ensuring that vendor quality standards were upheld.
- Reviewed and evaluated supplier performance, providing actionable recommendations that led to improved supplier quality and more effective procurement processes.
- Took charge of Incoming, In-process, and Final Quality Control activities, leading to improvement in overall product quality and a reduction in customer complaints.
- Identified the responsibilities, authorities, and training needs of staff under supervision, contributing to a more competent and efficient quality team.

Achievements:

1. Promoted to QA QC Manager, overseeing quality control and team management, and focusing on quality assurance and process improvement.
2. Led the successful certification of IATF16949:2016 Certification Project with zero major finding.
3. Acquired new business from Honda Accessories Europe and Singapore Airline Engineering Company by utilizing in-house lab testing equipment capabilities, cutting lead times by 90% and costs by 80% compared to third-party certification/test labs, to fulfill the required data for qualification and regular product monitoring.
4. Supported the recovery of 100% on-time deliveries of Jaguar Land Rover Headphone Bags by streamlining assembly process steps to ensure 'right-first-time' quality, meeting productivity targets, and delivery schedule
5. Achieved 80% reduction in scrap of Recaro Aircraft Seating laminated pad delamination issue by implementing a pre-conditioning room and re-characterizing lamination parameters.

6. Reduced Broken Seams defects through the installation of Servo motor technology and Needle Management system, addressing blunt needle issues, yielding 70% reduction in scrap.
7. Resolved SGD 120,000 return and claim of non-conforming microfiber leather material through data-driven negotiation with supplier
8. Supported Quality Director conducting on-site audit and approval of PVC leather supplier's new production site in Huizhou, Guangdong, China, resulting in an 80% reduction in non-conforming materials through improved communication and collaboration fostered during audit.

SKILLS

- Excellent data analysis compiling, communication, and presentation skills in English
- Capability of working in a Team and dynamic environment
- Strong sense of little details and able to solve the issues as timeline given.
- Well equipped with problem solving skills and coordinate with the team members.
